

I am forwarding my concern regarding LPFM and it's potential effect on a FM station that we listen to daily. K-LOVE serves the Denver Metro area and provides commercial free, family friendly and spirtual music and news to this region. Should an LPFM broadcaster displace this station it would be a travesity, as there is no other station that provides similar programming. The service that KLOVE provides is evident in that it is self supported by it's listeners. KLOVE provides individuals and families with programming that is clean, commercial free, and endearing. Please reconsider allowing LPFM stations to potentially take priority over current FM translator services, such as KLOVE.
